

Contents

Review Article

Nuclear Safety

- Integrated Level 1–Level 2 decommissioning probabilistic risk assessment for boiling water reactors
Davide Mercurio, Vincent M. Andersen, and Kenneth C. Wagner 627

Original Articles

Reactor Physics

- Safety margin and fuel cycle period enhancements of VVER-1000 nuclear reactor using water/silver nanofluid
Hassan Saadati, Kamal Hadad, and Ataollah Rabiee 639
- Reactivity balance for a soluble boron-free small modular reactor
Lezani van der Merwe and Chang Joo Hah 648

Thermal Hydraulics

- Self-pressurization analysis of the natural circulation integral nuclear reactor using a new dynamic model
Ali Farsoon Pilehvar, Mohammad Hossein Esteki, Afshin Hedayat, and Gholam Reza Ansarifar 654

Nuclear Safety

- Investigation of dust particle removal efficiency of self-priming venturi scrubber using computational fluid dynamics
Sarim Ahmed, Hassan Mohsin, Kamran Qureshi, Ajmal Shah, Waseem Siddique, Khalid Waheed, Naseem Irfan, Masroor Ahmad, and Amjad Farooq 665
- Uncertainty analysis of containment dose rate for core damage assessment in nuclear power plants
Guohua Wu, Jiejuan Tong, Yan Gao, Liguang Zhang, and Yunfei Zhao 673
- Survivability assessment of Viton in safety-related equipment under simulated severe accident environments
Kyungha Ryu, Inyoung Song, Taehyun Lee, Sanghyuk Lee, Youngjoong Kim, and Ji Hyun Kim 683

Nuclear I&C

- Design and development of enhanced criticality alarm system for nuclear applications
Padi Srinivas Reddy, R. Amudhu Ramesh Kumar, M. Geo Mathews, and G. Amarendra 690
- Wavelet operator for multiscale modeling of a nuclear reactor
Vineet Vajpayee, Siddhartha Mukhopadhyay, and Akhilanand Pati Tiwari 698

Nuclear Fuel Cycle and Radioactive Waste Management

- Sensitivity studies in spent fuel pool criticality safety analysis for APR-1400 nuclear power plants
Abdulrahman S. Al Awad, Abdalla Habashy, and Walid A. Metwally 709
- Thermal analysis of certain accident conditions of dry spent nuclear fuel storage
Svitlana Alyokhina 717

Contents

Nuclear Fuel and Reactor Materials

- Effect of CrN barrier on fuel-clad chemical interaction
Dongkyu Kim, Kangsoo Lee, and Young Soo Yoon..... 724
- Thermal transport in thorium dioxide
Jungkyu Park, Eduardo B. Farfán, and Christian Enriquez 731
- Development of an evaluation method for nuclear fuel debris-filtering performance
Joon-Kyoo Park, Seong-Ki Lee, and Jae-Hoon Kim..... 738

Radiation Application

- Application plan for radiological exposure model using virtual reality-based radiological exercise system
Dewhey Lee, Byung Il Lee, Younwon Park, and Dohyung Kim 745
- Design and construction of a new ultraviolet sensor using CsI deposition in the ionization chamber
R. Souri, A. Negarestani, S. Souri, M. Farzan, and M. Mahani..... 751

Nuclear Structural Analysis and Plant Management & Maintenance

- Effective numerical approach to assess low-cycle fatigue behavior of pipe elbows
Heung Woon Jang, Daegi Hahm, Jae-Wook Jung, and Jung-Wuk Hong 758

Nuclear Policy, Economics and Human Resource Development

- Examination of different socioeconomic factors that contribute to the public acceptance of nuclear energy
Viet Phuong Nguyen and Man-Sung Yim 767
- Policymakers and stakeholders' perceptions of science-driven nuclear energy policy
Nan Li, Dominique Brossard, Dietram A. Scheufele, and Paul P.H. Wilson..... 773

Technical Note

Nuclear I&C

- Development of field programmable gate array-based encryption module to mitigate man-in-the-middle attack for nuclear power plant data communication network
Mohamed Abdallah Elakrat and Jae Cheon Jung 780

Nuclear Fuel Cycle and Radioactive Waste Management

- Performance evaluation of METAMIC neutron absorber in spent fuel storage rack
Kiyoung Kim, Sunghwan Chung, and Junhee Hong 788
- Comparison of proliferation resistance among natural uranium, thorium-uranium, and thorium-plutonium fuels used in CANada Deuterium Uranium in deep geological repository by combining multiattribute utility analysis with transport model
Shinya Nagasaki, Xiaopan Wang, and Adriaan Buijs 794

Radiation Protection

- Development of low-cost, compact, real-time, and wireless radiation monitoring system in underwater environment
Jeong Ho Kim, Ki Hyun Park, and Koan Sik Joo 801

Contents

Analysis and radiation dose assessment of ^{222}Rn in indoor air at schools: Case study at Ulju County, Korea <i>ChoongWie Lee, Sungyeol Choi, and Hee Reyoung Kim</i>	806
