

Contents

Nuclear Fuel Cycle and Radioactive Waste Management

- Simulation analysis and evaluation of decontamination effect of different abrasive jet process parameters on radioactively contaminated metal
Lin Zhong, Jian Deng, Zhe-wen Zuo, Can-yu Huang, Bo Chen, Lin Lei, Ze-yong Lei, Jie-heng Lei, Mu Zhao, and Yun-fei Hua3940
- Electrochemical corrosion behavior of atmospheric-plasma-sprayed copper as a coating material for deep geological disposal canisters
Sung-Wook Kim, Gha-Young Kim, Young-Ho Lee, Jun-Hyuk Jang, Chung-Won Lee, Jeong-Hyun Woo, and Seok Yoon4032
- A review of the features, events, and processes and scenario development for Korean risk assessment of a deep geological repository for high-level radioactive waste
Kibeom Son, Karyoung Choi, Jaehyeon Yang, Haeram Jeong, Hyungdae Kim, Kunok Chang, and Gyunyoung Heo4083
- The influence of air gaps on buffer temperature within an engineered barrier system
Seok Yoon and Gi-Jun Lee4120
- Multi-body dynamics model for spent nuclear fuel transportation system under normal transport test conditions
Seongji Han, Gil-Eon Jeong, Hyeonbeen Lee, Woo-Seok Choi, and Jin-Gyun Kim4125
- Laser beam decontamination of metallic surfaces with a pulsed (150 W) Nd:YAG laser
Anne-Maria Reinecke, Margret Acker, Steffen Taut, Marion Herrmann, Wolfgang Lippmann, and Antonio Hurtado4159
- Concepts of heat dissipation of a disposal canister and its computational analysis
Minseop Kim, Minsoo Lee, Jinseop Kim, and Seok Yoon4173

Nuclear Fuel and Reactor Materials

- A reduced order model for fission gas diffusion in columnar grains
D. Pizzocri, M. Di Gennaro, T. Barani, F.A.B. Silva, G. Zullo, S. Lorenzi, and A. Cammi3983

Nuclear Policy, Economics, and Human Resource Development

- Artificial intelligence (AI) based analysis for global warming mitigations of non-carbon emitted nuclear energy productions
Tae Ho Woo4282

Nuclear Physics, Fusion, and Laser Technology

- Three-dimensional thermal-hydraulics/neutronics coupling analysis on the full-scale module of helium-cooled tritium-breeding blanket
Qiang Lian, Simiao Tang, Longxiang Zhu, Luteng Zhang, Wan Sun, Shanshan Bu, Liangming Pan, Wenxi Tian, Suizheng Qiu, G.H. Su, Xinghua Wu, and Xiaoyu Wang4274
- Investigation of the hydrogen production of the PACER fusion blanket integrated with Fe-Cl thermochemical water splitting cycle
Medine Özkaya, Adem Acır, and Şenay Yalçın4287

Nuclear Structural Analysis /Plant Management & Maintenance

- Effect of slab stiffness on floor response spectrum and fragility of equipment in nuclear power plant building
Yousang Lee, Ju-Hyung Kim, and Hong-Gun Park3956

Contents

Microstructure analysis of pressure resistance seal welding joint of zirconium alloy tube-plug structure <i>Gang Feng, Jian Lin, Shuai Yang, Boxuan Zhang, Jiangang Wang, Jia Yang, Zhongfeng Xu, and Yongping Lei</i>	4066
The effect of mechanical inhomogeneity in microzones of welded joints on CTOD fracture toughness of nuclear thick-walled steel <i>Long Tan, Songyang Li, Liangyin Zhao, Lulu Wang, and Xiuxiu Zhao</i>	4112
Failure simulation of nuclear pressure vessel under severe accident conditions: Part II – Failure modeling and comparison with OLHF experiment <i>Eui-Kyun Park, Jun-Won Park, Yun-Jae Kim, Yukio Takahashi, Kukhee Lim, and Eung Soo Kim</i>	4134
Failure simulation of nuclear pressure vessel under severe accident conditions: Part I - Material constitutive modeling <i>Eui-Kyun Park, Ji-Su Kim, Jun-Won Park, Yun-Jae Kim, Yukio Takahashi, and Kukhee Lim</i>	4146
Seismic behavior of simplified electrical cabinet model considering cast-in-place anchor in uncracked and cracked concretes <i>Bub-Gyu Jeon, Sung-Wan Kim, Sung-Jin Chang, Dong-Uk Park, and Hong-Pyo Lee</i>	4252
Stability and nonlinear vibration of a fuel rod in axial flow with geometric nonlinearity and thermal expansion <i>Yu Zhang, Pengzhou Li, and Hongwei Qiao</i>	4295

Radiation Application

Improved fast neutron detection using CNN-based pulse shape discrimination <i>Seonkwang Yoon, Chaehun Lee, Hee Seo, and Ho-Dong Kim</i>	3925
Thermal-hydraulic safety analysis of radioisotope production in HANARO using MCNP6 and COMSOL multiphysics: A feasibility study <i>Taeyun Kim, Bo-Young Han, Seongwoo Yang, Jaegi Lee, Gwang-Min Sun, Byung-Gun Park, and Sung-Joon Ye</i>	3996
Development of a DDA+PGA-combined non-destructive active interrogation system in “Active-N” <i>Kazuyoshi Furutaka, Akira Ohzu, and Yosuke Toh</i>	4002
Airborne HPGe spectrometer for monitoring of air dose rates and surface activities <i>Marcel Ohera, Lubomír Gryc, Irena Češpírová, Jan Helebrant, and Lukáš Skála</i>	4039
Labeling strategy to improve neutron/gamma discrimination with organic scintillator <i>Ali Hachem, Yoann Moline, Gwenolé Corre, Bassem Ouni, Mathieu Trocme, Aly Elayeb, and Frédéric Carrel</i>	4057
Development of a real-time mobile gamma-ray measurement system for shipboard use <i>Chang-Jong Kim, Mee Jang, Hyuncheol Kim, Jong-Myoung Lim, Wanno Lee, and Gyu-Seong Cho</i>	4077
Monte Carlo-based identification of electron and proton edges for calibration of miniaturized tissue equivalent proportional counter <i>Mingi Eom, Sukwon Youn, and Sung-Joon Ye</i>	4167
The effect of ionizing radiation on robotic trajectory movement and electronic components <i>Sofía Coloma, Paul Espinosa Peralta, Violeta Redondo, Alejandro Morono, Rafael Vila, and Manuel Ferre</i>	4191
Development, validation and implementation of multiple radioactive particle tracking technique <i>Mehul S. Vesvikar, Thaar M. Aljuwaya, Mahmoud M. Taha, and Muthanna H. Al-Dahhan</i>	4213

Contents

A novel radiation-dependence model of InP HBTs including gamma radiation effects
Jincan Zhang, Haiyi Cai, Na Li, Liwen Zhang, Min Liu, and Shi Yang4238

Design and optimization of thermal neutron activation device based on 5 MeV electron linear
accelerator
Mahnoush Masoumi, S. Farhad Masoudi, and Faezeh Rahmani4246

Radiation protection

Study of atmosphere parameters of the IVV-2M reactor hall
M.E. Vasyanovich, M.V. Zhukovsky, E.I. Nazarov, and I.M. Russkikh3935

Implementation of Visible monkey into general-purpose Monte Carlo codes: MCNP, PHITS, and Geant4
*Soo Min Lee, Chansoo Choi, Bangho Shin, Yumi Lee, Ji Won Choi, Bo-Wi Cheon, Chul Hee Min,
Beom Sun Chung, Hyun Joon Choi, and Yeon Soo Yeom*4019

The effect of geometrical parameters on the radon emanation coefficient and different radon
parameters
Entesar H. El-Araby and A. Azazi4096

A Study on the Construction of Cutting Scenario for Kori Unit 1 Bio-shield considering ALARA
Hak-Yun Lee, Min-Ho Lee, Ki-Tae Yang, Jun-Yeol An, and Jong-Soon Song4181

Gas ebullition associated with biological processes in radioactively contaminated reservoirs could lead
to airborne radioactive contamination
*E.A. Pryakhin, Yu.G. Mokrov, A.V. Trapeznikov, N.I. Atamanyuk, S.S. Andreyev, A.A. Peretykin,
K. Yu. Mokrov, M.A. Semenov, and A.V. Akleyev*4204

Reactor Physics

A study on (n, α) reaction cross sections using a new empirical systematic
Sema Küçüksucu and Mustafa Yiğit4026

Coupled neutronics/thermal-hydraulic analysis of ANTS-100e using MCS/RAST-F two-step code system
Tung Dong Cao Nguyen, Tuan Quoc Tran, and Deokjung Lee4048

Real variance estimation in iDTMC-based depletion analysis
Inyup Kim and Yonghee Kim4228

Thermal Hydraulics

Experimental research on flow regime and transitional criterion of slug to churn-turbulent and churn-
turbulent to annular flow in rectangular channels
Qingche He, Liang-ming Pan, Luteng Zhang, Wangtao Xu, and Meiyue Yan3973

Research on prediction and analysis of supercritical water heat transfer coefficient based on support
vector machine
Ma Dongliang, Li Yi, Zhou Tao, and Huang Yanping4102

Study of contact melting of plate bundles by molten material in severe reactor accidents
J.J. Ma, W.Z. Chen, and H.G. Xiao4266
