## Nuclear I&C

- Method to estimate communication error probabilities based on speech acts for nuclear power plants  
*Ilgeun Song, Taewon Yang, and Jonghyun Kim* .....103740
- Research on intelligent hierarchical control method for U-tube steam generator water level based on TD3-MPC  
*Peiqi Jiang, Hong Xia, Jiyu Zhang, Yihu Zhu, Yingying Jiang, Wenhao Ran, and Jinxu Pang* .....103741
- An intelligent fault detection method for PWR-type nuclear power plants using neuro-encoder binary cells  
*Furqan Arshad, Minjun Peng, Fazle Haseeb, and Wasiq Ali* .....103735
- Framework for evaluating cyber incident response capabilities of nuclear facility operators through operation-based exercises  
*Heewon Aneka Choi, Cheonho Park, JuHyeon Lee, Seungho Jeon, and Jung Taek Seo* .....103772
- Atmospheric neutron inducing single event effects on AI chips manufacturing with 8 nm FinFET  
*Yonghong Li, Jianan Tong, Weitao Yang, Zhiliang Hu, Lihua Mo, Tianjiao Liang, Chaohui He, and Jinghui Lan* .....103785

## Nuclear Fuel Cycle and Radioactive Waste Management

- Scenario analysis of radon attenuation efficacy of earthen cover for uranium mill tailings impoundment driven by dry and wet cycles  
*Changshou Hong, Fubing Li, Kaiqi Liang, Chengyu Zhang, Shengyang Feng, Hong Wang, De Huang, and Caiwu Luo* .....103755
- Thiol unit-functionalized ultrastable two-dimensional polymer for adsorption of palladium ions in a nitric acid medium  
*Hao Wu, Mai Tanaka, Naoki Osawa, and Seong-Yun Kim* .....103771
- Analytical solutions for thermal-hydraulic-mechanical-chemical modeling of smectite illitization in bentonite buffers for nuclear waste disposal  
*Lotanna Ohazuruike, Kyung Jae Lee, and Jin-Seop Kim* .....103778
- Dissolution of low burn-up ( $33 \text{ GWd}\cdot\text{t}^{-1}$ ) spent nuclear fuel at alkaline and hyperalkaline pH  
*Jakub Kokinda, Daniel Serrano-Purroy, Albert Martínez-Torrents, Joan de Pablo, Frederic Clarens, Alejandro Kinbaum, Sonia García-Gómez, and Javier Giménez* .....103783

## Nuclear Fuel and Reactor Materials

- Enhancing structural stability and mechanical performance of Pmmn-phase U<sub>2</sub>Mo alloy through V and Ti Doping: Insights from density functional theory  
*Shuaiyi Shui, Xinyu Zhang, Jia Song, Dezhong Wang, and Wentao Zhou* .....103758
- Modelling of the Compton neutron detector Hf emitter burn-up in the core of WWER-1000  
*Vladimir Gann, Pylyp Kuznietsov, and Alexander Ulybkin* .....103756
- Qualification of L-DED 316L for nuclear reactor core applications – Material characteristics before and after neutron irradiation  
*Štěpán Jedlan, Martin Ševeček, Josef Hodek, Michal Brázda, Antonín Prantl, Jaroslav Šoltés, Michael Sovadina, Jitka Klaisnerová, and Leoš Křivský* .....103765
- Monte Carlo analysis of nitrided Al-6061-T6 as an alternative fuel holder tube in subcritical reactors  
*Diego Medina-Castro, Hector Rene Vega-Carrillo, Antonio Baltazar-Raigosa, Tzinnia Gabriela Soto-Bernal, Régulo López-Callejas, and Benjamín Gonzalo Rodríguez-Méndez* ..... 103775

# Contents

---

Performance investigation of UN spherical fuel elements in MSR-SF  
*Haiqing Zhang, Changqing Cao, Peng Wang, Ziwei Li, Xuzhong Kang, and Jun Lin* .....103784

## Nuclear Policy, Economics, and Human Resource Development

The role of small modular reactors (SMRs) in achieving Net-Zero emissions by an approach to climate actions  
*Yun Il Kim and Tae Ho Woo* .....103774

National and local acceptance of nuclear power: A closer look at environmental benefit perception  
*Jin Won Lee and Seungkook Roh* .....103777

## Nuclear Physics, Fusion, Laser, and Accelerator Technology

In-situ diagnosis of heat loads on divertor tungsten targets using laser speckle digital image correlation  
*Zhang Dale, Jiang Menglai, Li Ledi, He Shengnan, Li Hang, Pan Zhiwei, Huang Shenghong, Wang Weihua, and Su Yong* .....103748

Influence of oversized atoms  $X = \text{Ti, Ta, W, Mo}$  on the dynamics of native defects under annealing in  $\text{Fe}_{35}\text{Cr}_{35}\text{V}_{20}\text{Cu}_5\text{-(X)}$  HEA studied by positron annihilation spectroscopy (PAS)  
*R. Domínguez-Reyes, M.A. Monge, A. Rodríguez-López, Y. Ortega, and B. Savoini* .....103743

A study of the electromagnetic fields leakage in TM020 mode HOM-damped cavity  
*Xuerui Hao, Junyu Zhu, Xiao Li, Zhijun Liu, Chunlin Zhang, Wei Long, Shengyi Chen, Yang Liu, Shenghua Liu, and Bin Wu* .....103717

Design of high intensity radio frequency quadrupole accelerator for Suzhou neutron source  
*X.W. Liu, Z.M. Zhang, L.S. Long, Z.Y. Zhang, G.X. Chen, L.P. Zou, Z. Yang, B.W. Zhou, J.D. Long, L. Lu, and W. Ma* .....103773

Design of 200 MHz CW  $\text{He}^{2+}$  APF-DTLs for  $^{211}\text{At}$  production  
*LiangZhou Yao, CanYu Wang, ZhengMao Zhang, Wei Ma, Liping Zou, Zhen Yang, Jinghe Yang, YuLin Ge, and Liang Lu* .....103795

Design of a 200 MHz CW  $\text{He}^{2+}$  RFQ for  $^{211}\text{At}$  production  
*Z.M. Zhang, X.W. Liu, L.Z. Yao, Z.Y. Zhang, L.P. Zou, Z. Yang, C. Zhang, W. Ma, and L. Lu* .....103794

## Nuclear Safety

Numerical modeling and characteristic analysis of the pneumatic noise of spring-loaded pressure relief valves  
*Dingsheng Xie, Puyu Jiang, Xinyu Zhao, Chunpu Zhang, Maoling Shi, and Chaoyong Zong* .....103760

Impact of representative ground motion level on seismic PSA with the boundary between overestimation and underestimation  
*Jisuk Kim and Man Cheol Kim* .....103753

Fast prediction of the flow induced vibration of wire-wrapped fuel rod in a lead-bismuth reactor based on improved DMD and LSTM network  
*Yu Zhang, Pengzhou Li, and Hongwei Qiao* .....103780

Capabilities of simple calculation models for the analysis of power reactors  
*Mohamed A. Gaheen* .....103762

# Contents

Probabilistic Model Chain Methodology for evaluating radiological consequences of accidents in High-Temperature Gas-Cooled Reactor  
*Piotr Kopka, Michał Spirzewski, and Piotr Darnowski*.....103779

## Radiation Application

Accuracy improving research on the calibration methods of organic scintillator detectors  
*Linjun Hou, Peng Xu, Zhimeng Hu, and Wangtao Yu* .....103757

Robust dosimetric evaluation of FLASH proton beams using plane-parallel ionization chambers and EBT-XD films for pre-clinical studies  
*Heesoon Sheen, Sunghwan Ahn, Chanil Jeon, Youngyih Han, Changhoon Choi, Hee Chul Park, Daizo Amano, Nagaaki Kamiguchi, and Sungkoo Cho* .....103749

Thermoluminescence and structural characterization of crystalline alkali strontium borates  
*Nabil El-Faramawy, E.M. Abou Hussein, and Mohamed El-Kinawy* .....103782

InChAP: A simple software for computation of charged particle interaction parameters  
*Ali Çiçi, Berk Morkoç, Hüseyin Dağ, Levent Aydımbakar, M.I. Sayyed, and Mehmet Büyükyıldız* .....103789

Impacts of  $^{60}\text{Co}$ - $\gamma$  irradiation on physicochemical characteristics and antioxidant activity of Tibetan medicine Pazhu powder (PP)  
*Yue Yang, Le Zhong, Rang yan po Luo, Zhong si ji Yang, Weishan Qiu, Juhong An, Rui Gu, and Shihong Zhong* .....103584

Development and performance analysis of a PIPS-based detection system for ultra-low Strontium-90 measurement in seawater  
*Younghak Kim, Hyuncheol Kim, Mee Jang, Jaehyeon Seo, Gahyun Kim, and Hyemi Cha* .....103797

Uncertainty evaluation of absorbed dose measurement based on temperature rise using a water calorimeter for  $^{60}\text{Co}$  gamma rays  
*In Jung Kim, Chul-Young Yi, Jong In Park, Yun Ho Kim, Young Min Seong, Seongmoon Jung, Rukundo Solomon, and Byung-Gun Park* .....103796

Exploration on high-energy and high-dose rate X-ray detection with Bridgman-grown  $\text{CsPbBr}_3$  single crystal  
*Ahreum Park, Beomjun Park, Jichul Seo, Jangwon Byun, Sung-Jun Park, Sung-Pil Yoon, Juyoung Ko, Jeongho Kim, Wonho Lee, and Man-Jong Lee*.....103799

Quantitative analysis of impurities in neutron transmutation-doped silicon carbide wafers using neutron activation analysis  
*Junhyeok Kim, Byung-Gun Park, Junesic Park, Gi-Doo Kang, Gwang-Min Sun, and Myong-Seop Kim* .....103798

Simultaneous measurement of radon exhalation rate and  $\text{CO}_2$  flux based on accumulation chamber technique with a closed-loop system  
*Haibo Yi, Chenxi Zu, Jiale Sun, Jiulin Wu, Huiying Li, Zhipeng Liu, Hongbo Xu, Shicheng Luo, Xianfa Mao, Xinyue Yang, Feng Xiao, Hongzhi Yuan, and Yanliang Tan* .....103805

## Radiation protection

Continuous cryogenic adsorption adjustments of radon in air using carbon-based microporous adsorbents  
*Xu Feng, Huijia Long, Chengtao Yue, ShouKang Qiu, Quan Tang, and LongCheng Liu*.....103704

Dual-purpose borate based glasses: optical features and Monte Carlo simulations of gamma radiation shielding M.I. Sayyed, K.A. Mahmoud, Shrikant Biradar, U. Rilwan, and Laith Ahmed Najam.....	103752
Occupational radiation doses to workers handling linkage management equipment for spent nuclear fuel at interim storage facility Shin-Dong Lee, Dong-Gyu Lee, Geon-Woo Son, Sang-Hwan Lee, and Kwang-Pyo Kim.....	103750
Radiological risk and mineralogical analysis of radionuclides in granitic rocks: Environmental insights Sherif A. Taalab, Diaa A. Saadawi, Turki Kh Faraj, Mayeen Uddin Khandaker, Mahmoud R. Khattab, and Mohamed Y. Hanfi.....	103759
To compare the image quality of high resolution CT scan of temporal bone reconstructed using novel adaptive statistical iterative reconstruction-v technique with conventional filter back projection reconstruction technique V. Ruth Monica and P. Preethi.....	103766
Radiological profiling of modern building materials: A case study of natural radionuclides in vitrified tiles from Tamil Nadu, India and their health implications A. Chandrasekaran and Ismail M.M. Rahman.....	103754
Radiological hazards and environmental impact of natural radioactivity and heavy metals in by-product and topsoil around a Malaysian coal-fired thermal power plant Eli Syafiqah Aziman, Mohd-Syukri Yahya, Shamsul Amri Sulaiman, Muhammad Asyraf Redzuan, Kamalia Rasyidah Sufyan, Rogemah Ramli, Mohd Idzat Idris, Aznan Fazli Ismail, Alif Imran Mohd Shuhaimi, and Rully Hidayatullah.....	103770
Harnessing zirconia and boron synergy: A novel pathway to superior radiation shielding materials Hanan Akhdar, Ahmed S. Haidyrah, Mohammad W. Marashdeh, K.A. Mahmoud, and Islam G. Alhindawy.....	103764

## Reactor Physics

Uncertainty quantification of steady state depelton solution using multi-physics coupling code system based on nodal diffusion code RAST-K Jinsu Park, Yeongseok Kang, and Deokjung Lee.....	103751
Micro-scale molten salt and metal reactor for space applications Jaehyun Ryu and Yonghee Kim.....	103776
Nuclide inventory analysis and fission product monitoring for nuclear safeguards in molten chloride fast reactors Saehyun Choi, Jeongwon Seo, Wonseok Yang, Jihun Kim, Taehoon Park, Sujeong Lee, and Sungyeol Choi.....	103793
Effect analysis of power density distribution & temperature dependent thermo-physical properties along MSR fuel channels applying neutronic and thermal hydraulic approach Mohammad Khan, Nayeem bin Zahid, Saad Islam, and Ali Mahdi.....	103791

## Thermal Hydraulics

Design and analysis of passive residual heat removal system for a new MW-class compact nuclear power system Leqi Yuan, Junli Gou, Zhenlan Wang, Bo Zhang, and Jianqiang Shan.....	103746
