

### ABOUT THE SCHOOL

The School of Space Qualification will provide background and context on Space Qualification, consistent with that of a professional development short course, targeting a wide range of Space and Defence Industry-relevant professionals, including students, engineers, physicists, computing scientists, lawyers, commercial entrepreneurs, consultants and advisors.

The school will be delivered by internationally recognized leaders in the Space Industry fields who will focus on Space Qualification requirements and testing of radiation effects in microelectronics, radiation hardness assurance and reliability, radiation testing facilities and radiation dosimetry.
