

Contents

Nuclear I&C

- Strategy of nuclear material accountancy of maritime molten salt reactor for safeguards by design
Junsung Park, Jimin Shin, Geunyoung An, Seungmin Lee, Sangick Lee, and Hee Seo104475

Nuclear Fuel Cycle and Radioactive Waste Management

- Surrogate-assisted constrained Bayesian optimization for Neutron Absorber design of LEU+ fuel storage
Keon Il Cha, Young Chul Cho, Jun ho Lee, Oh Duck Kwon, and Kyoong Ho Cha104432
- Separation of uranium and fission products via reductive extraction in fluoride molten salt-bismuth media
Ruifen Li, Changfeng She, Zhiqiang Cheng, Nan Ji, Wei Huang, and Yu Gong104428
- Conversion of radioactively contaminated soil into a reactive geopolymer precursor via thermomechanical activation
Jae-Young Pyo, Ga-Yeong Kim, Hwan-Seo Park, Ki-Rak Lee, Hyun Woo Kang, and Jung-Hoon Choi.....104445
- Execution experience of spent nuclear fuel dry storage projects in Taiwan
Chih-Hao Chen and Ru-Feng Liu.....104442
- Exploring the water-hydrogen catalytic isotopic exchange behaviors under high-temperature and high-pressure
Xuebin Wang, Dong Wu, Yuguo Yin, Yaming Liu, Shilin Hu, and Hao Ruan104437
- Photocatalytic reduction of uranium(VI) by g-C₃N₄/P25-TiO₂ composite under full spectrum
Pengliang Liang and Liyong Yuan.....104456
- Sorption behavior of cesium and strontium in shotcrete for high-level radioactive waste disposal tunnels
Gi-Jun Lee, Soo-Ho Chang, Soon-Wook Choi, and Han-Eol Kim104457
- Machine learning-based prediction and interpretability of Re(VII), Tc(VII), Th(IV), and U(VI) distribution ratios in solvent extraction of spent nuclear fuel reprocessing
Xiuyang Wu, Hengjie Cai, Yu Zhou, Chunyuan Zhan, Jiafan Zhou, Xiangxi Zeng, Yang Gao, and Meng Zhang104449
- Mechanism of enhanced leaching U and Sc by sulfuric acid with H₃NTA
Aifei Yi, Yuhan Tan, Zhiming Du, Linjun Tang, Meifang Chen, Haikuan Dong, Wensheng Liao, and Xuebin Su.....104464
- Impact of high-temperature heat treatment on pyroprocessing of LWR spent nuclear fuel: A thermodynamic and material flow analysis
Jin-Mok Hur, Ju Ho Lee, Sangkwon Lee, and Jae Soo Ryu104492

Nuclear Fuel and Reactor Materials

- IRadChain: an integrated full-chain, cluster dynamics-centered simulator for defect-to-property prediction in metallic materials
Qirong Zheng, Jun Liu, Liuming Wei, Chuanguo Zhang, Yonggang Li, and Zhi Zeng104411
- Synergistic improvement of strength and ductility in thermal-neutron absorption Al-Si-xGd alloys via cold rolling and annealing
Zixie Wang, Ao Liu, Xijie Wu, Jie Pan, Zeyuan Sun, Jun Li, and Xueshan Xiao104450
- Measurement of metallic uranium thin foil thickness for Mo-99 production targets by computed radiography
Eriki Masahiko Takara, Elita Fontenele Urano de Carvalho, Humberto Gracher Riella, José Antônio Batista de Souza, Pietro Trevisanello Puglia, Marcelo Kobayoshi, and Michelangelo Durazzo.....104458

Contents

Fracture propagation mechanism and CO ₂ +O ₂ in-Situ leaching effect of low-permeability sandstone-type uranium deposits under millisecond blasting Jie Wang, Qinghe Niu, Wei Wang, Yanguang Liu, Tie Lu, Jienan Pan, Zhenzhi Wang, Wei Yuan, Yudi Huang, Xiangyu Yuan, Quancheng Hou, and Xinghua Shi	104461
Helium ion irradiation hardening of SLM fabricated Inconel 718 alloy Jing Xing, Qiwei Quan, Shilong Li, Xiangbing Liu, and Jingli Yan.....	104480

Nuclear Policy, Economics, and Human Resource Development

Energy uncertainty and its heterogeneous impacts on nuclear energy production and hydrogen technology Naif Alsagr.....	104413
The Impact of safety regulation on the quantity and quality of technology innovation in nuclear energy enterprise: A quasi-natural experiment based on the Nuclear Safety Law of China Chao Li, Wanjin Zhu, and Longshun Liao	104419

Nuclear Physics, Fusion, Laser, and Accelerator Technology

Research on predicting the impact of different impurity seeding rates on divertor detachment based on ensemble learning Hao Duan, Zelong Li, Qi Zeng, Qianhong Huang, Peng Yu, Qingyi Tan, Qixuan Long, Bo Peng, and Xueyu Gong.....	104423
Geometric optimization and experimental validation of the redesigned ICRF antenna on the J-TEXT tokamak Wentao Geng, Donghui Xia, Junjie Wu, Mengxiang Xie, Lianghui Yang, Yulong Deng, Xixuan Chen, Yonghua Ding, and the J-TEXT Team.....	104452
Neutron induced single event burnout in Si IGBTs: Experimental evaluation and simulation based comparison between accelerated and atmospheric neutron irradiation conditions Hao Yu, Zijie He, Chengxiang Han, Cheng Zhuang, Xirui Zhou, Pei Li, and Chaohui He	104451
Fast prediction method of formation dip angles in horizontal wells based on conventional natural gamma-ray logging Zheng Shen, Zhen Qin, Cheng Wang, Fei Tian, Xiaofeng Zhang, Lingyi Meng, Kangjian Wei, and Kejia Su.....	104469
Vacuum leak detection of a magnetic confinement fusion device Jinyu Kang, Xiang Zhu, Shuqi Yang, Yaowei Yu, Muquan Wu, Hang Li, Ying Liu, Jingchun Li, Xiaodong Lin, and Xiang Gao	104467
Design study of rebunchers for the low-energy experimental system at the RAON heavy-ion accelerator Donghyun Kwak, Cheolmin Ham, Woojin Song, Garam Hahn, Moses Chung, and Kyoungcho Tshoo.....	104468

Structural Integrity Analysis and Plant Management & Maintenance

A collaborative layout method for cable trays driven by cable paths in nuclear power plants Hailong Du, Kai Tang, Xiuan Zhou, Jie Cheng, Di Wu, Meng Wang, Lei Wang, Jianjun Wang, and Puzhen Gao	104421
Comparative creep-fatigue assessment of a representative intermediate heat exchanger in a high-temperature gas-cooled reactor system J. Lum, M.N. Tran, J.J. Kruzic, M.C. Messner, and O. Muránsky.....	104424

Contents

Failure assessment of RPV lower head penetration weld using finite element and crack model analyses Makhsuda Juraeva, Jang Min Park, Kukhee Lim, and Eunho Kim	104455
---	--------

Nuclear Safety

Optimizing system-level reliability of fail-safe isolation valves in SMR using Fault Tree Analysis Kibeom Son, Sung-Min Shin, and Jin Hee Park	104356
---	--------

Radiation Application

Experimental results of a DOI-based directional radiation monitoring system Yoon Soo Chung, Hee-Kyun Baek, Juwan Kang, Jiwon Ra, and Yong Hyun Chung	104426
Research on two-stage image denoising algorithm based on Feature Fusion for neutron imaging Shuai Li, Bing Hong, Yuzhong Qian, Xiancai Meng, Yuanyu Liu, Wei Gu, Zhiyu Hou, Yang Wang, and Dongpeng Song	104425
Impact of proton irradiation on SiN _x and Si-SiO ₂ interfaces in FLASH memory cell Haesung Kim, Junseong Park, Jisung Im, Hansol Kim, Yu-Mi Kim, Kwanseo Park, Sung-Jin Choi, Dae Hwan Kim, Dong Myong Kim, Young Jun Yoon, Sung Yun Woo, and Jong-Ho Bae	104433
Analytical modeling of a proton recoil telescope Francesco Cordella, Gerardo Claps, Veronica De Leo, Danilo Pacella, Fabio Panza, and Antonella Tamburrino	104435
Development and performance evaluation of a high-speed gamma-ray imaging system Goeun Lee, Taehyeon Eom, Jaeho Cho, Sehyun Jang, Hyun Su Lee, Jong Hwi Jeong, Junyoung Lee, and Chan Hyeong Kim	104444
Water equivalence of 3D-Printed ABS-Pro for orthovoltage phantom dosimetry: Radiological characterization and TOPAS Monte Carlo validation across 100–300 kVp A. Khallouqi, W. Alloui, A. Slimani, H. Sekkat, A. Halimi, and O. El Rhazouani	104447
Determination of the absorbed dose of epithermal neutrons in a phantom object filled with water Gayratulla Kulabdullaev, Andrey Kim, Gayana Abdullaeva, and Djasur Yuldashev	104460
One-dimensional localization of fast neutrons and gamma rays using a GAGG-based directional probe: A Monte Carlo study Yuhang Qiu, Tiantian Dai, and Qingyang Wei	104453
Impact of patient centering on radiation dose and image noise in computed tomography: noise reduction potential of adaptive statistical iterative reconstruction Y. Oustous, A. Oustous, Y. El Attaoui, Z. Airouss, M. El Katib, F. Chehab, N. Ech-cherif El Kettani, and M. Jiddane	104459
A fabrication-friendly trapezoidal boron-10 converter geometry for high-efficiency solid-state neutron detection Avinash Nayak	104470
Pulse reconstruction for indirect characterization of neutron generator emission profiles Gyu Hyeon Sim, Junehyung Lee Bernaski, Joo Hyung Kim, Sehwan Seol, Yong Kyun Kim, and Jae Chang Kim	104466
Development and performance evaluation of a phantom for dose measurement in radiation blood irradiators Jung-Lye Ko, Hyeon-Jun Hwang, Yong-Min Kim, Sang-Hwii Lee, Jeong-Yeon Han, Seung-Wook Baek, Gyu-Ha Ryu, and Jae-Hwan Cho	104465

Contents

Exploratory validation of DVH-based radiobiological modeling in prostate SBRT: Associations between predicted TCP/NTCP and observed biochemical control and toxicity O. El Mouden, H. Sekkat, H. Bendouro, A. Bannan, F. Chaara, Y. Berrada, R. El Baydaoui, M. Bougteb, M. Tahiri, O. El Rhazouani, and M. Mkimel	104471
Regression-based gain optimization for alpha imaging detectors in spectroscopic alpha autoradiography Hyun Su Lee, Byungsoo Kim, Ilhan Lim, Ho Young Kim, Kwangil Kim, Kyochul Lee, and JongGuk Kim.....	104476
A dual-chopper adjustable-pulse isotopic neutron source to support the development of in-situ planetary exploration payloads Yan Zhang, Chunlei Yang, Jinhui Qu, Chi Liu, Haoran Zhang, Jinyu Deng, Tao Ou, Chengmei Wu, Qi Liu, Renbo Wang, and Bin Tang	104481
Neutronics characterization of the NTD holes at JRTR using Monte Carlo simulations Saed Almomani, Rashdan Malkawi, Mahmoud Suaifan, Sayel Marashdeh, Kafa Al-Khasawneh, and Majd Hawwari	104487
Optimization of a CT simulation protocol for breast cancer radiotherapy using response surface methodology Oussama Nhila, Mohammed Talbi, Morad Erraoudi, Maroine Tahiri, M'hamed El Mansouri, and El Mahjoub Chakir	104485

Radiation protection

Optical properties and multi-radiation shielding performance of cement dust incorporated bismuth-vanadium-borate glasses K.R.M. Abdelgawad, Hisham A. Saleh, R.L. Elwan, A.M. Fayad, and R.M. Ahmed	104416
A broadband sustainable shielding index (SSI) for multi-radiation fields: Quantifying performance – Environment trade-offs in composite shielding materials Asmaa E. Abu-rayan	104414
Spatial Risk Indices Distribution via Contamination and Radioactivity of Atshan and Darhib Talc Mines, Arabian Nubian Shield El Saeed R. Lasheen, Basma A. El-Badry, Nilly Kawady, Mokhles K. Azer, Tamader Alhazani, and Ahmed Abdelaal	104431
Toward safe operation of modern synchrotron radiation sources: Computational tools, shielding strategies, and activation phenomena Yu Li, Hanshang Lin, Yao Yang, Lei Yang, Xirui Zhou, Junqiang Zhang, Yao Zhang, Zhongquan Li, and Bocheng Jiang	104430
Radon (^{222}Rn) activity levels in bottled drinking water in South Africa: an assessment of health risk using Monte Carlo simulations Samuel Odumu Ogana John and Manny Mathuthu	104422
Quantitative analysis of radioactivity and radiological hazards in ornamental stones Mohamed Y. Hanfi, Sharif Abu alrub, Mohammad Marashdeh, and Ahmed E. Abdel Gawad	104429
Radiological environmental impact assessment for landfill disposal of NORM waste in South Korea Jeong Woo Lee, Shin Dong Lee, Ju Young Kim, Seung Beom Yoo, and Kwang Pyo Kim	104448
An exploratory study on ^{222}Rn measurement method using a length-compensated proportional counter Rio Furukawa, Hideki Harano, Yasutaka Omori, Yuna Sakai, Yasushi Sato, Seiya Manabe, Tetsuro Matsumoto, Morihito Shimizu, Akira Yunoki, and Shinji Tokonami	104454

Contents

Reactor Physics

- Neutronic performance and safety analysis of FeCrAl-coated SiC reflector in a boron-free SMR using LEU+ fuel
Yeongseok Kang, Jinsu Park, Yongsik Yang, Changhwan Shin, and Deokjung Lee104434

Thermal Hydraulics

- Numerical investigation of the impact of bubble dynamics on heat transfer in two-phase flow within rod bundle subchannels of a small modular reactor core
Salman M. Alzahrani, Muhna Alshammari, Saud Aldawood, and Salman M. Alshehri104420
- Benchmarking the MARS code for molten salt reactor applications using MSRE transient experiments
Jae Jun Jeong, Yun Je Cho, Hyun Chul Lee, and Byongjo Yun.....104438
- Pressure pulsation and entropy generation of a reactor coolant pump under reverse-rotation conditions
Daoxing Ye, Junhong Chen, Tian Wen, Jiang Guan, Song Xiang, Yongkang Liu, and Difeng Han104443
- Assessment of SPACE-CAP codes coupling reactor coolant system and containment for LOCA (loss-of-coolant accident) integral effect tests in ATLAS-CUBE facility
Byoung-Uhn Bae, Jae Bong Lee, Yu-Sun Park, Junyeong Jung, and Kyoung-Ho Kang104463
- A new reduced order model within Newton iteration framework for neutronics/thermal-hydraulics coupling problem
Yongwang Ding, Han Zhang, Lixun Liu, Xinru Peng, Chuzhen Peng, Jiong Guo, and Fu Li.....104439
- Experimental study of air-steam jet discharges into quiescent water
D. Blanco-Muelas, C. Berna-Escriche, and J.L. Muñoz-Cobo104477

Corrigendum

- Corrigendum to “Radionuclides measurements using Raman spectrometers for the analysis of advanced nuclear reprocessing” [Nucl. Eng. Technol. 57(8) (2025) 103605]
L.J. Bonales, I. Sánchez-García, and H. Galán104588
