NUCLEAR ENGINEERING AND TECHNOLOGY
Volume 58, Number 11, November 2026

Contents

Nuclear I&C

Reliable statistics-based detection and investigation of anomalies in a SMART valve system
Ark Ifeanyi, Anutam Bairagi, Sarah Creasman, Tran C.H. Nguyen, Jamie Coble, Vivek Agarwal, and Minghui Chen 104490

Methodological comparison between EMBRACE and EPRI HRA: A case study on critical operator actions in an advanced control room
Jaewhan Kim and Yochan Kim 104503

Hybrid data augmentation for uncertainty mitigation in machine learning based fault diagnosis of pressurized water reactor nuclear power plants
Fazle Haseeb, Minjun Peng, Furqan Arshad, Khan Awais, and Wasiq Ali 104498

Nuclear Fuel Cycle and Radioactive Waste Management

Technical evolution of the Philippine Radioactive Waste Management Facility: Infrastructure development, regulatory alignment, and inventory overview
John Wilkin F. Lim, Angelo A. Panlaqui, Ray Matthew A. Bunquin, and Ronald E. Piquero 104500

Colloid stability and radionuclide adsorption on bentonite colloids: relevance to conservative safety assessment assumptions
Chuan-Pin Lee and Shih-Chin Tsai 104499

Experimental evaluation of cesium removal from contaminated concrete by preheating and attrition treatment
Munemichi Kawaguchi, Keigo Sokugawa, and Kazuhiro Sawa 104517

Gamma-ray Compton scattering: a tool for activity localization in metallic waste arising from decommissioning
Angelos Markopoulos, Kristina Mikalauskienė, Darius Germanas, Marina Konstantinova, Elena Lagzdina, Laurynas Juodis, Rita Plukienė, Artūras Plukis, Vidmantas Remeikis, and Anastasia Savidou 104522

Impact of high alkalinity and gamma radiation on the leaching stability of cement-solidified heavy metal mixed waste
Yulim Lee, Youjin Oh, Ugyu Jeong, Hongjeong Lee, and Jaeyeong Park 104502

Lightweight design of an SNF disposal canister copper lid via topology optimization with stress linearization
Chang-Yeong Lee, Seok Yoon, and Gil-Eon Jeong 104535

Selective precipitation of strontium and barium from molten $MgCl_2$ following chlorination using carbonate and sulfate reagents
Seol Kim, Eunsoo Lee, Byeonggwan Lee, Jung-Hoon Choi, Sang-Kwon Lee, Chang Hwa Lee, and Eun-Young Choi 104536

Glass-bonded ceramic wasteform using ferric sludge from radioactive wastewater as the primary structural matrix
Sungjune Sohn, Richard I. Foster, Maengkyo Oh, Yonghwan Byun, Kwang-Wook Kim, and Keunyoung Lee 104534

Process stability in immiscible Fe-Cu arc deposition via torch angle modulation: A fundamental study for spent nuclear fuel disposal canisters
Jae-Deuk Kim, Young-Ho Lee, Jin-Seop Kim, and Yonghyeon Lee 104541

An International Journal of the Korean Nuclear Society
NUCLEAR ENGINEERING AND TECHNOLOGY
Volume 58, Number 11, November 2026

Contents

Nuclear Fuel and Reactor Materials

UO_2-composite fuels with enhanced thermal conductivity for improved safety and performance of LWRs - A review of the technological status and challenges
Jae Ho Yang, Dong Seok Kim, Heung Soo Lee, Hyo Chan Kim, Yang-Hyun Koo, Yunsong Jung, and Dong-Joo Kim 104489

Analysis of the internal characteristic changes of the nuclear main pump under forward rotation conditions
Daoxing Ye, Yongkang Liu, Tian Wen, Jiang Guan, Song Xiang, Junhong Chen, and Chenguang Zhao 104496

An efficient inverse method for nuclear graphite damage based on physics-informed neural networks
Yao Xu, Junhao Li, Yanan Yi, Min Huang, and Qibing Zhu 104520

Probabilistic failure assessment of spent nuclear fuel cladding based on critical crack depth
Sangil Choi, Ju-Chan Lee, Donghak Kook, Woo-Seok Choi, and Taehyung Na 104540

Nuclear Policy, Economics, and Human Resource Development

Techno-economic and probabilistic assessment of grid-connected nuclear–renewable hybrid energy systems for island power systems: A case study of Bangka Belitung
Ihsan Ahmad Badrianto, Roni Irnawan, Hossam A. Gabbar, and Sarjiya 104482

Opportunities and challenges of regulating nuclear innovations in non-nuclear countries. An agile toolkit for embarking ecosystems. The case of Greece
Aspasia Petri and Ioannis Vikas 104491

A value-feasibility framework for scenario prioritization across adversary resource tiers in nuclear deployment contexts
Inhye Hahm, Seongyeol Oh, Kwang-Seop Son, Jae-Gu Song, Hojin Ryu, and Sungyeol Choi 104516

Nuclear Physics, Fusion, Laser, and Accelerator Technology

Design and preliminary tests of the IH-DTL II for heavy ion therapy
C.Y. Wang, Z.Y. Zhang, C.P. Wang, J. Shi, W.D. Chen, Y.L. Ge, and L. Lu 104497

Simulation study of the curtain-type liquid lithium jet as a muon source target
Jianwei Niu, Han-Jie Cai, Zhilv Zhang, Guihao Lu, Huan Jia, Zongbiao Ye, Yunpeng Cao, Xiaobo Li, Binbin Tian, Jincheng Li, Rong Wang, Yuanshuai Qin, and Yuan He 104511

Design and optimization of a multi-aperture rebuncher model cavity for high current neutron sources
Weiming Li, Xin Zhuo, Baichuan Wang, Fuyu Yang, Zhongming Wang, Minwen Wang, Mingze Tuo, Peng Xu, and Wolong Liu 104506

Reynolds-number-sensitive similarity mapping and cryogenic verification of supercritical helium circulating pumps using liquid nitrogen
Yingqiu Zhu, Xuanbo Cheng, Qiyong Zhang, Anyi Cheng, Yixuan He, Hao Luo, and Zijian Zhang 104528

Nuclear structure evolution and collective dynamics in even–even $^{98-108}$Ru isotopes via IBM-1 and IBM-2
Amir A. Mohammed Ali, Doaa Ali Shamran, Alyaa A. Abd-Aljbar, Fadhil I. Sharrad, N. Aldahan, and Abdurahim A. Okhunov 104530

Investigation of pressure wave propagation under In-box LOCA scenario in the test blanket module for the CFETR COOL blanket
Shuailing Lu, Qixin Ling, Xuebin Ma, Kecheng Jiang, and Songlin Liu 104542

An International Journal of the Korean Nuclear Society
NUCLEAR ENGINEERING AND TECHNOLOGY
Volume 58, Number 11, November 2026

Contents

Common iron passive magnetic shielding for scintillator array photomultiplier tubes
T. Atovullaev, S. Cherepanov, A. Atovullaeva, J. Kahlbow, M. Patsyuk, O. Hen, A. Bochkova, G. Johansson, I. Kruglova, B. Meirovich, M.M. Miloi, S. Nepochatykh, E. Piasetzky, S. Piyadin, A. Salamatin, S. Sedykh, S. Segev, and Y. Zhang 104537

Linear canted permanent magnet field derivation for low dispersion undulator design
L. Feigin and A. Nause 104526

Structural Integrity Analysis and Plant Management & Maintenance

Failure estimation method for locally wall-thinned pipes based on plastic instablity load
Yoshihito Yamaguchi and Yinsheng Li 104479

Enhanced seismic performance of standard control cabinets in nuclear power plants using a tuned mass damper
Jae-Hong Kim, Jung-Dae Son, Jung-Han Kim, Do-Young Kim, Kwang-Jae Heo, Ji-Yeon Lee, Il-Hwan Moon, and Dookie Kim 104514

Structural analysis of helically coiled once-through steam generator tubes in small modular reactors under density wave oscillation—part I: Numerical formulation
Kyucheol Jeong, Gyeonghyeon Cho, Kang-Heon Lee, Seongmin Chang, Jae-Yoon Jeong, Kwanghyun Ahn, Hun Sik Han, and Jonghun Yoon 104513

Quantitative assessment of road network accessibility during earthquakes: A case study on support personnel access to the Hanul nuclear power plant
Gungyu Kim, Shinyoung Kwag, Jeong-Gon Ha, Jinhee Park, and Seunghyun Eem 104519

Nuclear Safety

ICP-MS analysis of long-lived radionuclides: A review of gas usage and applications of quantum chemical calculations in the collision/reaction cell
Junran Xiao, Hai Wang, Deng Tang, Zheping Zhang, Ruiqing Wang, Xu Zhang, Chengtao Yue, and Shuo Meng 104484

Numerical simulation of the behavior of radionuclide polonium under a typical accident in lead-bismuth-cooled reactors
Jiaqing Wang, Haixia Wang, Xuewei Fu, Wenhao Wu, Mengzhuo Xu, Size Chen, Taosheng Li, and Jie Yu 104525

Intrusion analysis for physical protection systems based on multilevel flow modeling
Jian Liu, Bo Zong, Zhiyong Wang, Lin Yang, and Yun Wang 104512

Sampling-based methods for estimating functional failure probability of passive safety systems
Yongjoon Lee and Gyunyoung Heo 104543

Radiation Application

Conceptual design study of neutron detectors for safeguards measurement of an irradiated pebble
Jianwei Hu, Donny Hartanto, Stephen J. Tobin, Mara M. Handley, and Robert McElroy Jr 104495

Experiment and simulation of soft error characteristics in 14nm FinFET and 28nm SRAMs at 2400m deep underground
Yufeng Dong, Guoguang Lu, Zhifeng Lei, Chao Peng, Yujuan He, Liping Zou, Wei Ma, Liang Lu, and Zhangang Zhang 104494

An International Journal of the Korean Nuclear Society
NUCLEAR ENGINEERING AND TECHNOLOGY
Volume 58, Number 11, November 2026

Contents

Multivariate statistical analysis of natural radionuclide distribution and radiation hazard indices within isolated dyke and its usability in the construction industry in the Tekirova region (SW Türkiye)
Alper Gunes, Fusun Yalcin, Esra Uyar, M. Arikan Yalcin, Mehmet Demirbilek, M. Gurhan Yalcin, S. Bilge Ocak, Nurdane Ilbeyli, and Ugur Gokmen 104486

Automated neutron dosimetry with bubble detectors using CNN-based object detection
Xin-yan Li, De-bin Zou, Yan-qing Deng, Chao-zhi Li, Wei Qi, Shu-kai He, Bo Cui, Kai-yuan Feng, Chen Xie, Jin-long Luo, Li-xiang Hu, Jie Feng, Fu-qiu Shao, and Tong-Pu Yu 104493

Flexible Bi_2O_3-SiO_2-rubber composite for X-ray shielding
Zhengkui Zeng, Di Yan, Rongjia Wang, Isaac Kwasi Baidoo, Yugang Chen, Houhua Xiong, and Jifu Du 104501

Total ionizing dose effects in CMOS low-dropout regulators: Experiments and bias-dependent simulations
Zhigang Peng, Haojie Bai, Jincheng Hou, Zijie He, Hao Yu, Yang Li, Huan He, Yonghong Li, Pei Li, and Chaohui He 104509

Gamma-ray detector efficiency for radionuclides deposited on the pipe wall surrounding the detector
Abouzeid A. Thabet, Mohamed S. Badawi, Ayman Hamzawy, Mohamed I. Badawi, and Bohaysa A. Salem 104521

A multi-agent system for automated MCNP input review using open-weight LLMs
Byoungil Jeon and Soobin Lim 104524

Radioisotope identification under spectral variability using convolutional neural network with structured 2-D transformed gamma spectra
Yong Hyun Kim, Chan Joong Kim, Hancheol Yang, Dong Geon Kim, and Yong Kyun Kim 104532

Radiation protection

Radiation exposure in interventional cardiology: Implications for patients and healthcare workers
H.A. Abdel Ghany, Asmaa Salah, and H.M. Diab 104488

Nano-$BaSO_4$/waste PVC/natural rubber composites as lead-free and sustainable diagnostic X-ray shielding materials: Fabrication and performance evaluation
Jarosjan Veerathihiran, Ariya Khamnuandet, Prachnawadee Hongboon, Chalisa Moonlek, Worawat Poltabtim, Pattra Lertsarawut, and Kiadtisak Saenboonruang 104507

Transport mechanisms of chemical explosion clouds and sensitivity analysis of key parameters over double-hill terrain
Yuheng Li, Tao Wang, Haijian Xue, Weiyi Li, Hongbo Qiu, and Minghua Lv 104510

Measurement-based characterization of spatial and depth-dependent activation in medical cyclotron vault concrete for decommissioning: The case study of the Severance Hospital
Min Jun Kim, Seon Young Hwang, Jang Jin Oh, Jae Kwon, and Kwang Pyo Kim 104523

Specific absorbed fractions and S values for alimentary tract of Korean and Asian populations
Chansoo Choi and Bangho Shin 104531

A preliminary evaluation of aminomethanesulfonic acid as a new EPR dosimetry system
Ahmed M. Maghraby and Tarek A. Ebeid 104533

Reactor Physics

Efficient reactor irradiation production technology for Ra-223
Yongpeng Chen, Qingquan Pan, Xiaojing Liu, Jian Lu, and Xiaoling Zhao 104505

An International Journal of the Korean Nuclear Society
NUCLEAR ENGINEERING AND TECHNOLOGY
Volume 58, Number 11, November 2026

Contents

A hybrid Doppler broadening method combining Kernel Broadening and Gaussian-type integration for ultra-high temperatures
Xin Guo, Ning Xu, and Chen Hao 104504

Neutronic feasibility of a HALEU-started breakeven molten salt fast reactor with a simple closed fuel cycle
Eunhyug Lee, Young-June Lee, Seokjoo Yoon, Jong-Il Yun, and Yonghee Kim 104508

Comparative benchmarking of ENDF/B-VIII.1, ENDF/B-VIII.0, and ENDF/B-VII.1 libraries for criticality, depletion, and uncertainty analyses with McCARD
Ho Jin Park, Kiyun Bang, and Hoseong Yoo.....104529

Study on the neutronics characteristics of a mixed-spectrum lead-bismuth fast reactor design based on BeO component box
Jinjie Xiao, Song Li, Yongfa Zhang, Jiannan Li, Cong Zhang, and Qian Chen.....104527

Quantitative analysis of signal response components in self-powered neutron detectors under in-core mixed neutron-gamma irradiation fields
Xiong Wu, Jieqiong Jiang, Liheng Wang, Jiasi Yu, Li Cai, Xiangju Zhang, Zhihong Liu, and Zhiqiang Cui.....104518

Development of an improved reactivity measurement system for reactor physics tests during HANARO startup
Beomwoo Park, Youngjin Eom, Sang Jun Park, Chung Ki Min, Byung-Gun Park, and Dong Hyuk Lee 104545

Thermal Hydraulics

A novel porous sleeve design for Atmospheric Release Valves: Enhancing structural reliability through coupled thermo-fluid-structural analysis
Jianian Chang, Yihua Ding, Hongwei Xu, Xizhuo Le, Jianfeng Mao, Yingjie Xu, and Mingya Chen 104478

A refrigerant-based fluid-to-fluid scaling for PWR integral effect testing: Design and verification of PATRIOT
Doyeong Lim, Ik Jae Jin, Joo Hyung Seo, and In Cheol Bang 104544
