Contents

The Second Saudi International Conference on Nuclear Power Engineering (SCOPE 2025)

Final design and safety analysis of the 30 MWth HTGR-POLA reactor
Jakub Sierchuła and Michał Spirzewski *104418*

Analysis of soluble boron control strategy based on mode-K+ and sliding mode observer for APR1400 load follow operation
Dongju Choi, Yunseok Jeong, and Yonghee Kim *104446*

Neutronic design implications of chlorine isotopic enrichment in moderating-reflector molten salt fast reactors
Young-June Lee, Eunhyug Lee, and Yonghee Kim *104556*

Adaptive parametric reconstruction with the generalised empirical interpolation method on the DYNASTY loop with limited instrumentation
Mohammad Alrwashdeh, Carolina Introini, Stefano Riva, Xiang Wang, Francois Foulon, Khurrum Saleem Chaudri, Saeed Al Ameri, and Antonio Cammi *104606*

Probabilistic model chain methodology for defining emergency planning zones for iPWR-type reactors
Piotr Kopka, Tomasz Kwiatkowski, Anna Wawrzynczak, Michał Jędrzejczyk, and Afaque Shams *104652*

Nuclear I&C

Research on regularization optimized ANN model in BJTs total ionizing dose effect analysis
Yanru Ren, Min Zhu, Yang Liu, Xuehui Dai, Jingyun Zhao, Lei Jian, and Minghui Liu *104597*

AtomicGPT: A domain-adapted large language model for secure on-premises applications in nuclear engineering
Seungdon Yeom, KyungTae Lim, and Yonggyun Yu *104565*

Nuclear Fuel Cycle and Radioactive Waste Management

Research progress of spent fuel reprocessing processes based on carbonate medium
Chenxi Hou, Xue Dong, Jian Ding, Gang Zhang, Mingjian He, Tinggui Yang, Wei Gong, and Caishan Jiao *104586*

Immobilisation of decontamination sludge in low-carbon cement: a study of early-age physico-mechanical behaviour of two alkali-activated slag-based waste forms
M. Criado, J. Puentes, E. Torres, L. Ramallo, J. Juan Ruiz, and A. Pachón-Montaño *104562*

A critical review on the treatment of radioactive wastewater: Technical efficacy, operational challenges, and the paradigm shift toward valorization
Yafeng Ren, Xiang Qin, Yongbo Qin, Chao Gao, Dong Liang, Li Zhang, and Meilan Jia *104515*

Nuclear Fuel and Reactor Materials

Removing oxygen-derived impurities from molten chloride fuel salts with aluminium chloride: Effectiveness and limitations
Jihun Kim, James Daw, Wonseok Yang, Francesca Brooks-Ward, Molli Forber, Sujeong Lee, Saehyun Choi, Taehoon Park, Richard I. Foster, Clint A. Sharrad, and Sungyeol Choi *104629*

Computational assessment of the feasibility of conversion of the impulse graphite reactor to high-assay low-enriched uranium fuel
Ruslan A. Irkimbekov, Olzhas M. Zhanbolatov, Artur S. Surayev, and Galina A. Vityuk *104630*

An International Journal of the Korean Nuclear Society
NUCLEAR ENGINEERING AND TECHNOLOGY
Volume 58, Number 12, December 2026

Contents

Thermomechanical analysis of UO_2 fuel rods with SiC_f/SiC composite cladding under normal and accident conditions
Yuyang Zhao, Qin Zeng, Zhiwei Lu, Jiye Zheng, Jiaxiang Xue, and Yehong Liao 104553

Nuclear Policy, Economics, and Human Resource Development

Financing small modular reactors: A domain-constrained AI knowledge tool benchmarked against practitioner insight
Rohunsingh Sam, Tristano Sainati, Robert Kay, and Timothy Cockerill 104605

Regulatory readiness for SMRs in Greece: An institutional gap analysis of a latent EU newcomer
Ioanna Ananiadou and Demetrios Papacostas 104631

Nuclear Physics, Fusion, Laser, and Accelerator Technology

Radionuclide production cross-sections from proton-induced reactions on natural iron up to 100 MeV
Sung-Chul Yang, Dal-Ho Moon, Myung-Hwan Jung, and Young Seok Hwang 104738

Design and development of a 65 kA/50 μH multi-layer spiral air-core pulse inductor for the CRAFT Quench Protection System
Meng Xu, Hua Li, Wei Tong, Guanghong Wang, Zhiquan Song, Yiyun Huang, and Peng Fu 104625

The damping capability of bunch-by-bunch feedback system under the influence of noise and power limitation
Jinliu Su, Yudong Liu, Di Yin, Junhui Yue, Liwei Pan, and Chenghui Yu.....104577

Design and multi-objective optimization of a high-energy beam transport line with thermal safety verification for AB-BNCT
Jinglun Li, Haipeng Li, Haoquan Su, Jinghe Yang, and Sheng Wang.....104576

Integration scenario of a distributed Traveling Wave Antenna in European DEMO
Amro Bader, Francisco A. Hernández, Riccardo Ragona, and Guangming Zhou 104548

Structural Integrity Analysis and Plant Management & Maintenance

Frequency-dependent in-cabinet seismic demand for NPP cabinets using shell-based efficient FE model
Towhid Ahmed, Shariful Islam, Dong Van Nguyen, and Dookie Kim 104608

Bayesian-updated seismic fragility of reactor containment building considering multiple damage states
Md Samdani Azad, Duy-Duan Nguyen, Bidhek Thusa, Minji Choi, and Tae-Hyung Lee.....104587

Characteristics of eddy current signals with magnetite-induced flow path blockage in trefoil-type tube support plates of steam generators
Jeoh Han, In Chul Kim, and Kuk-Hee Lee 104602

A review of limitations, upgrade strategies, and performance projections for nuclear power generation system uprates
Junyung Kim, Khaldoon Al Dawood, Logan Williams, Daniel Mikkelson, and Tyler Westover.....104580

Modal characteristics of CFETR cryostat thermal shield considering prestress effect of fluid-structure interaction
Xiangyu Pan, Xiaojun Ni, Songbo Han, and Jian Ge 104578

An International Journal of the Korean Nuclear Society
NUCLEAR ENGINEERING AND TECHNOLOGY
Volume 58, Number 12, December 2026

Contents

Probabilistic analysis of creep buckling in GH3535 cylindrical shells considering uncertainty in initial geometric imperfections
Xiang Duan, Xiao-Yan Wang, Ying-Zha Peng, Bing-Bing Chen, Xiao Wang, and Zhi-Jun Li 104566

Nuclear Safety

Real-time hydrogen monitoring based on the thermal response of passive autocatalytic recombiners during severe accidents
Youngsu Na 104593

Radiation Application

Nuclear technology for hydrogen generation: Pathways, coupling physics, and the niche role of γ-radiolysis
Ralph Santos-Oliveira 104561

Efficient multi-parameter optimization design of cyclotron-based compact thermal neutron radiography system
Lian-Xin Zhang, Si-ze Chen, Kai-Zhong Ding, Yu-Cheng Wu, Rui Zhang, and Chen-Xiao Yang 104557

Constraints on nuclear-driven photon generation and radiation transport in extreme-energy systems
Karanvir Bhinder 104581

Mask design with non-uniform thickness for artifact suppression in coded-aperture gamma-ray imaging: A Monte Carlo study
Yuhang Qiu, Tiantian Dai, and Qingyang Wei 104558

Experimental validation of a statistical model for spectrometry with pileup rejection
S. Pommé, S. Cheng, B. Pierson, B. Archambault, M. Flaska, and K. Pelczar 104572

Impact of trap centers on the scintillation performance of $TlSr_2Br_5:Eu^{2+}$ single crystal
G. Rooh, H.J. Kim, L.T. Truc, A. Khan, H.B. Albargi, D. Joseph Daniel, S. Kim, J. Kaewkhao, S. Kothan, and J.H. Kim 104590

A plastic scintillator-based cosmic ray test platform
Ze Song, Dongshuo Du, Li Gong, Aiqiang Guo, Xiaoshen Kang, Cheng Li, Xin Li, Yutie Liang, Zheng Liang, Chuangxin Lin, Dexu Lin, Zebo Tang, Ye Tian, Boqun Wang, Yonggang Wang, Yishuang Zhang, and Yuxiang Zhao 104560

Monte Carlo investigation of spectral modifications induced by a W/Al selective filter in 6 MV flattening filter-free photon beams
Ismail Lagrini, Mohamed Bencheikh, Abdellah Khallouqi, Hamza Sekkat, and Ibrahim Maouhoubi 104636

Effects of thermal annealing on gamma-irradiated microscale β-SiC powders: Dose-dependent structural, optical, and electrical response
Fatemeh Soltanifar, Ehsan Ebrahimibasabi, and Mohammad Mahdi Shahidi 104599

Radiation protection

Study on the separation performance of polyimide hollow fiber membranes for radon and oxygen
Meng He, Ning Zhou, Qi Zhong, Hua-Li Zuo, and Yong-Jun Ye 104569

Novel single crystalline $Li_2CaSiO_4:Eu^{2+}$ high light yield scintillator for thermal neutron detection
Mikhail Korzhik, Ilya Komendo, Dmitry Vorontsov, Anna Zakharova, Anton Konakov, S. Senthamizh Raja, J. Heinrich Pierson, Mukannan Arivanandhan, Ganapathy Sasikala, Elizaveta Borisevich, Aliaksei Bondarau, Valery Kozhemyakin, Ilya Lagutskiy, Vitaly Mechinsky, and Igor Avetissov 104559

An International Journal of the Korean Nuclear Society
NUCLEAR ENGINEERING AND TECHNOLOGY
Volume 58, Number 12, December 2026

Contents

Encoder-only transformer with simulation-to-experiment transfer for radionuclide identification in NaI(Tl) spectroscopy
Yuan Sun, Dawei Guo, Yingnan Luo, Wuhui Lin, Fei Tuo, Qiang Zhou, Baolu Yang, Zhenglin Ye, and Qinghua Bai 104436

Synergistic enhancement of mechanical and X-ray shielding properties in natural rubber latex gloves containing Bi_2O_3 nanoparticles through multilayer design
Ariya Khamnuandet, Ekachai Wimolmala, Worawat Poltabtim, Pattra Lertsarawut, and Kiadtisak Saenboonruang 104589

Ambient dose equivalent assessment from a pulsed electron beam using GEANT4-based Monte Carlo simulation
P. Jaikaew, M. Jitvisate, and S. Rimjaem 104570

Feasibility study on deep learning-based human organ dose estimation in monoenergetic point-source exposures
Yoomi Choi, Hyoungtaek Kim, Min Chae Kim, Sora Kim, Byung-Il Min, Kyung-Suk Suh, Jungil Lee, and Jiyoon Kim 104579

Strontium-90 determination in milk ash by cherenkov and gas-flow proportional counting: A comparison of three radiochemical separations
Silvia Dulanská, Veronika Demovics Silliková, Klára Gebeová, Zuzana Goneková, Michal Trnka, and Ján Pánik 104633

Training and inter-laboratory comparison of TL/OSL techniques within the Korea retrospective dosimetry network
Hyoungtaek Kim, Min Chae Kim, Jongheon Kim, Jeong Tae Lee, Hanjin Lee, Hyungjoon Yu, Jae Seok Kim, Byung Min Lee, HyoJin Kim, Yeong-Rok Kang, and Jungil Lee 104623

Reactor Physics

A computational time reduction method applied to core optimization calculations
Marco Antonio C. Lima, Adilson C. da Silva, Aquilino S. Martinez, Alessandro C. Gonçalves, Luis Lionel Salas Ramón, Artur S. Silva, Álefe C.R. Lima, and Willian V. de Abreu 104583

Verification of the FLUKA code for RPV neutron dosimetry and radiation damage based on the NUREG/CR-6115 PWR benchmark problem
Kuanhao Liu, Xianpeng Yin, Yingming Sang, Bin Zhang, and Da Chen 104622

Anisotropic diffusion coefficient for pin-by-pin two-step method
Junwei Qin, Yunzhao Li, Yisong Li, Liangzhi Cao, and Hongchun Wu 104584

Parametric power escalation and failure threshold analysis of advanced fuels in SCLWRs via coupled neutronic–thermal-hydraulic simulation
Mohamed Y.M. Mohsen, Shlash A. Luhaib, Nassar Alnassar, Sultan J. Alsufyani, Ouadie Kabach, Sitah Alanazi, and A. Abdelghafar Galahom 104582

Development and verification of a cross-section parameterization method for a rod-controlled gas-cooled micro-reactor with synchronous control rod operation
Xiang Xiao, Yuan Yuan, Guoming Liu, Zhiyuan Feng, Kui Hu, Yuan Xu, Yunhuang Zhang, and Peng Zhang 104596

Weighted Least-Squares evaluation and nuclear data sensitivity analysis of fertile material (n,γ) and (n,2n) cross-sections (0.1–25 MeV) for ADS reactor design
S. Mukherjee, K. Katovsky, and Rajnikant Makwana 104555

An International Journal of the Korean Nuclear Society
NUCLEAR ENGINEERING AND TECHNOLOGY
Volume 58, Number 12, December 2026

Contents

Monte Carlo neutronic analysis of Er_2O_3 discrete burnable absorber rods in a VVER-1200 fuel assembly
Tasnimul Fahim Tanvir and Md. Masum Rana Pramanik 104554

Investigating the neutronic potential of control rod materials for improved accident tolerance and providing sufficient shutdown margin in PWRs under uprated conditions
Rahnuma Aziz Nisa, Chase Alexander Stormoen, and Ben Lindley 104547

Thermal Hydraulics

Thermal-hydraulic performance and transient safety evaluation of a power-uprated natural circulation SMR with a Truly Optimized PWR core
Jae Hyung Park, Jihun Im, Hyo Jun An, JinHo Song, and Sung Joong Kim 104592

Development of a simplified thermal analysis model for CANDU spent fuel dry storage basket
Tae Gang Lee, Taehyung Na, June Kee Min, and Jae Jun Jeong 104607

A design and experimental investigation of thermal characterization of a high-power lithium target under proton-beam-equivalent loading for accelerator-based boron neutron capture therapy (BNCT)
Jianfei Tong, Jiahui Chen, Ruiqiang Zhang, Youlian Lu, Congju Yao, Bin Zhou, Tianjiao Liang, and Shikui Dong 104539

Design and construction of a scaled mock-up facility for molten salt reactor drain system behavior
Joo Hyung Seo, Ji Yong Kim, and In Cheol Bang 104594

Sensitivity analysis of simulation parameters for gas-liquid two-phase flow in a hooked corrugated plate separator
Mengdi Ye, Xinru Gui, Yuqiang Fu, Anbang Zheng, Maosen Xu, and Xuelong Yang 104567

Physics-based conjugate heat transfer refinement for microlayer sub-grid model and X-ray-informed transition-angle modeling for single-bubble nucleate boiling simulations
Zuzhi Li, Jonghwi Choi, Jihoon Han, Ho Jae Kwak, and Hyungdae Kim 104538

GPU acceleration of the CUPID two-fluid Thermal–Hydraulic Code: Design, algorithmic challenges, and performance evaluation
Ik Kyu Park, So Hyun Park, and Iljin Kim 104575

Thermal radiation shielding effects on radiative heat transfer in a metal containment vessel under normal operation applicable for small modular reactors
Beomjin Jeong, Geunyoung Byeon, Namgook Kim, JinHo Song, and Sung Joong Kim 104568

Technical reviewers for Nuclear Engineering and Technology, 2026 104737
