Special Issue

Special issue on International Conference on Mathematics and Computational Methods Applied to
Nuclear Science and Engineering 2017 (M&C 2017)

<i>Han Gyu Joo and Won Sik Yang</i>	1113
Multilevel acceleration of scattering-source iterations with application to electron transport <i>Clif Drumm and Wesley Fan</i>	1114
A multilevel in space and energy solver for multigroup diffusion eigenvalue problems <i>Ben C. Yee, Brendan Kochunas, and Edward W. Larsen</i>	1125
Acceleration of step and linear discontinuous schemes for the method of characteristics in DRAGON5 <i>Alain Hébert</i>	1135
Recent developments in the GENESIS code based on the Legendre polynomial expansion of angular flux method <i>Akio Yamamoto, Akinori Giho, and Tomohiro Endo</i>	1143
Clustering and traveling waves in the Monte Carlo criticality simulation of decoupled and confined media <i>Eric Dumonteil, Giovanni Bruna, Fausto Malvagi, Anthony Onillon, and Yann Richet</i>	1157
Limits on the efficiency of event-based algorithms for Monte Carlo neutron transport <i>Paul K. Romano and Andrew R. Siegel</i>	1165
Analysis of inconsistent source sampling in monte carlo weight-window variance reduction methods <i>David P. Griesheimer and Virinder S. Sandhu</i>	1172
A new approach to the stabilization and convergence acceleration in coupled Monte Carlo-CFD calculations: The Newton method via Monte Carlo perturbation theory <i>Manuele Aufiero and Massimiliano Fratoni</i>	1181
Particle tracking acceleration via signed distance fields in direct-accelerated geometry Monte Carlo <i>Patrick C. Shriwise, Andrew Davis, Lucas J. Jacobson, and Paul P.H. Wilson</i>	1189
In-line (α, n) source sampling methodology for monte carlo radiation transport simulations <i>David P. Griesheimer, Andrew T. Pavlou, Jason T. Thompson, Jesse C. Holmes, Michael L. Zerkle, Edmund Caro, and Hansem Joo</i>	1199
Neutron clustering in Monte Carlo iterated-source calculations <i>Thomas M. Sutton and Anudha Mittal</i>	1211
Surrogate based model calibration for pressurized water reactor physics calculations <i>Bassam A. Khuwaileh and Paul J. Turinsky</i>	1219
Integral nuclear data validation using experimental spent nuclear fuel compositions <i>Ian C. Gauld, Mark L. Williams, Franco Michel-Sendis, and Jesus S. Martinez</i>	1226
Benchmarks of subcriticality in accelerator-driven system at Kyoto University Critical Assembly <i>Cheol Ho Pyeon, Masao Yamanaka, Song-Hyun Kim, Thanh-Mai Vu, Tomohiro Endo, Willem Fredrik G. Van Rooijen, and Go Chiba</i>	1234
A lumped parameter method of characteristics approach and multigroup kernels applied to the subgroup self-shielding calculation in MPACT <i>Shane Stimpson, Yuxuan Liu, Benjamin Collins, and Kevin Clarno</i>	1240

Contents

SIMMER extension for multigroup energy structure search using genetic algorithm with different fitness functions <i>Mattia Massone, Fabrizio Gabrielli, and Andrei Rineiski</i>	1250
Analysis of alpha modes in multigroup diffusion <i>Richard Sanchez, Daniele Tomatis, Igor Zmijarevic, and Han Gyu Joo</i>	1259
A new Tone's method in APOLLO3® and its application to fast and thermal reactor calculations <i>Li Mao and Igor Zmijarevic</i>	1269
Practical resolution of angle dependency of multigroup resonance cross sections using parametrized spectral superhomogenization factors <i>Hansol Park and Han Gyu Joo</i>	1287
The extinction probability in systems randomly varying in time <i>Imre Pázsit, M.M.R. Williams, and Lénárd Pál</i>	1301
Large eddy simulation of turbulent flow using the parallel computational fluid dynamics code GASFLOW-MPI <i>Han Zhang, Yabing Li, Jianjun Xiao, and Thomas Jordan</i>	1310
Multiphase turbulence mechanisms identification from consistent analysis of direct numerical simulation data <i>Ben Magolan, Emilio Baglietto, Cameron Brown, Igor A. Bolotnov, Gretar Tryggvason, and Jiakai Lu</i>	1318
MC21/CTF and VERA multiphysics solutions to VERA core physics benchmark progression problems 6 and 7 <i>Daniel J. Kelly III, Ann E. Kelly, Brian N. Aviles, Andrew T. Godfrey, Robert K. Salko, and Benjamin S. Collins</i>	1326
CTF/DYN3D multi-scale coupled simulation of a rod ejection transient on the NURESIM platform <i>Yann Périn and Kiril Velkov</i>	1339
Automated inventory and material science scoping calculations under fission and fusion conditions <i>Mark R. Gilbert, Michael Fleming, and Jean-Christophe Sublet</i>	1346
Neutron and gamma-ray energy reconstruction for characterization of special nuclear material <i>Shaun D. Clarke, Michael C. Hamel, Angela Di Fulvio, and Sara A. Pozzi</i>	1354
Numerical convergence and validation of the DIMP inverse particle transport model <i>Noel Nelson and Yousry Azmy</i>	1358
